Engineering Education

Volume 75, Numbers 1-8, 1984-85

The page numbers in this index refer to the eight issues of *Engineering Education* for 1984-85.

1-62	October	249-310	February
63-124	November	311-614	March
125-186	December	615-676	April
187-248	January	677-738	May

Note: The March issue, devoted to Engineering Research and Graduate Study, contains its own detailed index.

In this index, **boldface** type indicates subject headings; *italics* indicate authors; and titles of articles and departments appear in regular type. Page numbers are explained above.

A

ABET: 156-158
accreditation: 156-158
administrators: ET, 701-705, 706-712; hiring, 113-114
advance organizers: 288-291, 682
The Advanced Manufacturing Laboratory at RPI, 144
Aids for Educators, 58, 122, 184, 240, 308, 672, 728
Albertson, Harold, 721
The American Revolution and the 'Want of Engineers,' 268
Anand, Vera B., 717
Ansari, Ali, 111
ASEE News Briefs, 204, 630
ASEE Survey of Engineering Faculty and Graduate Students, Fall 1983, 50
ASEE: about the Society, 22; active projects, 35; annual conference (1984), 24, (1985), 634; awards, 25; board of directors and staff, 39; design competition & display, 61; division & section chairmen, 43; federal liaison, 37; long-range planning, 196; membership categories and fees, 34; nominees for offices, 173-175; organization chart, 41; program chairman, 56; publications, 38; services, 33; zones & sections, 42
attrition, student: 664-668

B

Bean Guessing and Related Problems in Engineering, 218
behavioral objectives: 288-291, 682
Berry, William B., 318
Blank, Gary B., 91
Britain: 106, 269
Brown, Ann E., 91
Burnet, George, 206
Books by ASEE Members, 180, 305, 671, 727
business games: 159-161

C

CAD/CAM: 237
Calendar, Society, 4, 66, 128, 190, 252, 314, 618, 680
Chalk, William S., 109
Changes in Accreditation, Current and Future, 156
Cheshier, Stephen R., 706
Choosing the Chairman, 113
Coberly, Camden A., 320
A Combustion Laboratory for Undergraduates, 654
communication: (see **writing**)
Computer Graphics Tutorial to Teach Orthographic Projection, A, 238
computer graphics: (see **graphics, computer**)
Computer Programming Projects in Technology Courses, 716
computers: 142, 285-287, 294; in eng. tech., 716-719; hardware, 140; network, 143-144; ownership requirements, 140, 142-143; remedial education, 138-143
computerized numerical control (CNC): 145-149
Conflicts in University-Industry Interactions, 320
continuing education: 198, 659-664
Cook, M. Kathleen, 235
Covington, David H., 91
creativity: 106-107
crystal structure demonstration: 299
Cunningham, Richard G., 156
curriculum: & computers, 138-143, 212-213; ET, 721; future, 212-214; humanities & soc. science, 215-217

D

Dean, Russell K., 288
degrees: 637-645, 650-653
Demonstration of Crystal Structure, 299
DeRusso, P.M., 144
design: 106-108, 109-111, 154-155, 213; & manufacturing projects, 146; microprocessor, 231-233
Desrochers, A., 144
Development of a Traditional Computer-Aided Graphics Course for Engineering Technology, 717
Devon, Richard F., 138

DEFINITION OF THE ENGINEERING METHOD

By Billy Vaughn Koen

In seeking a philosophical foundation for engineering, B.V. Koen, professor of mechanical engineering at the University of Texas at Austin, leads the reader to a fresh understanding of the engineer's method. Triggered by society's need for change, comfortable with uncertainty, guided by rules of thumb, limited by available resources, the engineer works to create the best—the "optimum"—as measured against the current state-of-the-art.

This witty and provocative essay is intended both for engineers, who will appreciate the distinctions drawn between engineering and science, and for others, who may find the distinctions clear for the first time.

A Definition of the Engineering Method, 80+ pages, paperbound, $7, prepaid. ASEE Publications, Suite 200, 11 Dupont Circle, Washington, D.C. 20036.
